PROFILE

Entrepreneurial software engineer with a passion for crafting quality products. Builds software independently as well as in collaborative team environments. Enjoys challenges, learning and teaching. Constantly tinkers in spare time. Loves traveling, soccer, and foosball.

EXPERIENCE

SoftArtisans – VP of Development

November 2012 – April 2014

- Responsible for multiple teams of developers, both in-house and offshore
- Produced consistent quarterly releases including major version 9, which introduced long awaited features such as an Excel formula calculation engine and the addition of a new product, PowerPointWriter, to the OfficeWriter suite
- Made large infrastructural improvements, including upgrading from Visual Studio 2008 to Visual Studio 2012 with ReSharper and moving to cloud based source control, making developers more efficient
- Assisted with recruiting and technical screening of prospective candidates as well as follow-up training for new hires and interns

SoftArtisans - Software Engineer / Scrum Master

November 2011 – November 2012

- Efficiently implemented bug fixes and new features in a TDD manner
- Developed a VSTO Excel Add-In for report generation and integration with our product and SSRS
- Maintained Jenkins continuous build server and build scripts
- Built internal tools to speed up development time, including a tool to diff Office Documents

SoftArtisans - .NET Developer / Technical Services Engineer

November 2010 – November 2011

- Supported customers by assisting in debugging of their applications and created reproduction cases for any bugs found
- Engaged in multiple consulting project

SamPlusPlus - Freelance Consultant

January 2003 - Present

- Provide web and software based solutions for numerous individuals and small business
- Troubleshoot various computer/network problems over the phone, via remote desktop, or on site

SKILLS

C#, VSTO, ASP.NET, Git, ReSharper, XML, HTML, CSS, JavaScript, SQL, SSRS, Jenkins, Ant, WiX

EDUCATION

Rochester Institute of Technology
